

Patrick's Path™ Partner Briefing

A behavioral-health crisis navigation network created by Patrick Dowling. patrickspath.com

Mission

Patrick's Path empowers people and communities affected by mental-health and substance-use challenges by connecting lived experience, education, crisis-system navigation, advocacy, recovery resources, and innovative approaches to compassionate care.

Live now

- Public crisis and resource-navigation pages (911, 988, mobile crisis, hospitals)
- New Hampshire community-resource directory: mental health organizations, clubhouses, food, shelter, recovery and treatment
- AI-powered helper that suggests listed community resources for non-emergency needs (nothing typed is saved)
- Website demonstration environment, including a transfer-tracking sandbox with pretend cases
- Approved-staff area with manually entered bed and mobile-crisis team status

Pilot-ready workflows

- Partner workflows and organizational onboarding
- Resource-sharing workflows (for example, copying local resources into NH Care Connections Resource Share)
- Staff sandbox demonstrations
- Potential authenticated partner access
- Short, role-specific micro-learning training from Patrick Dowling

Partner-dependent / future integration options

- Single sign-on via SAML or OpenID Connect (e.g. Microsoft Entra ID, Okta)
- EHR integration (Epic, Oracle Health/Cerner, behavioral-health EHRs) via APIs, FHIR or secure data feeds
- Health-system, county or payer portal embedding
- Real-time bed or service availability feeds

These require technical evaluation, security review, agreements, and participation from the relevant organizations. Patrick's Path is not a plug-and-play EHR application.

Privacy limitations

- Patrick's Path does not collect or store patient or health information today.
- It does not claim HIPAA compliance, certification, or a Business Associate Agreement with any organization.
- Any exchange of protected health information would require appropriate hosting, agreements, security controls and compliance processes.
- Patrick's Path does not dispatch emergency responders. In danger, call 911; in crisis, call or text 988.

Disclaimer

Patrick's Path™ is independent and is not affiliated with, endorsed by, or sponsored by any company, agency, EHR, payer or platform named here unless stated in a signed agreement. Patrick's Path™ is a trademark of Patrick Dowling.
